

Sub  
C1  
B1

31. A system as claimed in claim 15 wherein, if said tip is not located in said image plane, said mixing unit mixes a projection of said tip in said image plane into said 2D image.

32. A system as claimed in claim 15 wherein said mixing unit mixes a circle, as said designation, into said 2D image, said circle having a diameter which is alterable dependent on said magnitude of said distance.

33. A system as claimed in claim 15 wherein said mixing unit mixes said designation into said 2D image with an alterable color intensity indicating said magnitude of said distance.

Claim 16 has been amended as follows:

Sub  
C1  
B2

16. (Amended) A system comprising:  
an image signal acquisition unit for acquiring image signals of a first subject,  
and an image unit for producing an image of said first subject from said image signals;  
a support mechanism for supporting said first subject;  
a position acquisition system for determining a position of said image signal acquisition unit, said support mechanism, and a second subject relative to said image signal acquisition unit; and  
a mixing unit for mixing a representation of said second subject into said image of said first subject dependent on said position of said image signal acquisition unit, said support mechanism, and said second subject relative to said image signal acquisition unit.
